

PORTABLE SPACE HEATER PRODUCT COMPARISON

“ What if you could purchase a superior heater that, in it's FIRST year, ended up saving you money? ”

“Torpedo”-style
Forced-Air Heater

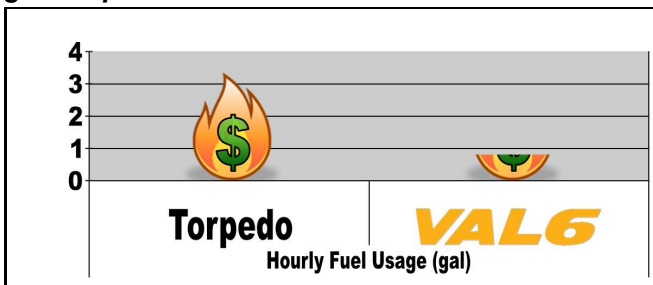

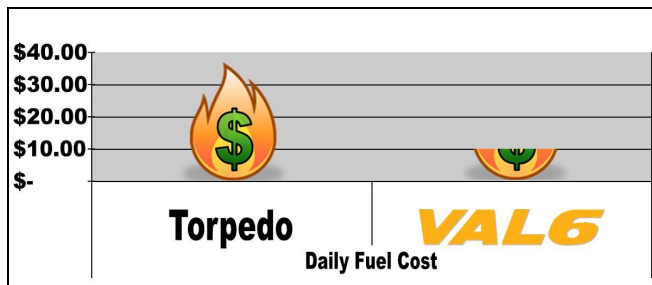

VS

VAL6
Radiant Heater

- Fuel Versatility** ✗ ✓
 The VAL6 utilizes both kerosene and the cheaper, off-road diesel—Torpedo styles only utilize kerosene.
- Fuel Efficiency** ✗ ✓
 92% vs 99%—The VAL6 doesn't waste your fuel investment. This means no fumes, burning eyes or headaches!
- Heating Styles** ✗ ✓
 The VAL6 uses radiant heat like the sun, instead of forced air heat. Heated air rises and blows away, but radiant heat warms objects. The air around you can be cold, but you'll still be warm. The heat is not affected by the elements.
- Energy Efficiency** ✗ ✓
 The VAL6 needs only as much energy as a 100W light bulb. With an adapter, you can run the heater off your vehicle's cigarette lighter! Set the VAL6 on your tailgate and work virtually anywhere!

Fuel Cost & Usage Comparison

Seasonal Fuel Cost

	Torpedo	VAL6
Fuel Consumption (gal/hr)	3.1	0.85
Daily Fuel Usage (4hrs/day)	12.4 gal.	3.4 gal.
Fuel Cost/Gallon	\$3.00	\$3.00
Fuel Cost/Day	\$37.20	\$10.20
Fuel Cost/Week	\$186.00	\$51.00
Fuel Cost/Month (21.7 work days)	\$807.24	\$221.34
Fuel Cost/Season (4 months)	\$3,228.96	\$885.36
Total First Year Cost	\$3,728.96	\$2,885.36
Difference	\$843.60	\$843.60
